NEW FALL OPTIONS

Experience Autumn in Alaska

Autumn is a slim season in Alaska, peaking out between the broad shoulders of summer and winter. It may be shy, but it has power. There are fewer travelers in the fall. Bears haven't hibernated yet, so you're more likely to get a glimpse of them. And, your local adventure guides might feel more relaxed in autumn than during prime, tourist season.

By mid-September, the skies begin getting dark enough that you've got a good shot at seeing the Aurora Borealis from Anchorage. Stay three or four nights for a superior experience under their surreal lights. If you want to shop for regional art, you're likely to get good buys in the fall. Autumn is Alaska's secret, and it's waiting for your arrival.
